THE WESTERN FEDERATION DISTRIBUTE CIRCULARS.

(International-American.) The trouble makers and organizers of the Western Federation of Miners yesterday flooded Douglas with circulars bearing the heading, "Statement to the Workmen of Douglas." The circular is of the usual Western Federation and socialistic brand; it indulges in denunciation of newspapers and business men of Bisbee and Douglas who have opposed a disturbance of the peaceful and prosperous industrial conditions which have prevailed during the entire history of the mining industry in these centers.

This circular pleads with the workmen of Douglas to ally themselves with the Western Federation union here, notwithstanding the known fact that such a union will never receive recognition from either the Copper Queen or the Calumet and Arizona companies. The Western Federation is the same in Douglas as it was in Bisbee. Organizers Rawlings and Cannon forced themselves and their union charter into Bisbee in opposition to 87 per cent of the miners employed there as expressed by ballot at an election managed by the men themselves; these organizers knew that neither the companies nor the men employed by them desired that a union should be organized. The miners who were receiving all that they could hope for in wages were content to have the camp remain "open" to all workmen, union and non-union, as had always been the case. There had never been any semblance of friction between the companies and the miners; good feeling prevailed and everybody was satisfied while the condition of the laboring man was ideal, with free library and reading rooms, a splendid Y. M. C. A. building with complete modern equipment, splendid schools for the children and handsome churches. Certainly the conditions in Bisbee were as nearly ideal for the laboring man as can be hoped for this side of the pearly gates when Rawlings, Cannon, Semple and other Western Federation organizers arrived in camp with their Western Federation charter.

Everybody knows what happened in Bisbee and anybody but a fool can guess what will happen in Douglas if Rawlings and his force of organizers are accepted as the Saviors of mankind, which they profess. When the Western Federation union charter was carried to Bisbee by Rawlings, Semple and Cannon it is estimated that there were not less than 75 per cent of the miners employed there who had at some time in the past been connected with that labor organization and who were in

There has been no order given by me sending the battleship fleet to the Pacific.—President Roosevelt. —Donnell in St. Louis Post-Dispatch.

good standing in the union where they had formerly held membership. Now there is not a single man of the five thousand miners working in the Bisbee mines who is affiliated with the Western Federation. Perhaps one thousand of the union men refused to obey the ridiculous strike call, but they have all been excommunicated and branded as "scabs." Of the union men formerly employed in Bisbee perhaps 1500 left their work to escape being branded as scabs by Rawlings, Semple, et al. Not only did these men lose their positions, but before doing so, according to report, contributed \$7000 in initiation fees and dues to the local union which they left to maintain a strike that had not even the support of the large majority of the men who quit work. All the mechanics connected with the operation of the mines—carpenters, engineers, firemen, etc., turned a deaf ear to the "scab" threats of the strike managers; the business men of Bisbee were a unit in condemning the unwarranted disturbance of the camp brought on by the strike. The strike at Bisbee failed because it was not approved outside the circle of the organizers and walking delegates. Public sentiment among the miners, carpenters, blacksmiths, engineers, firemen and the business men were against the strike and those who caused it. Under these conditions the strike was doomed from the beginning. Today there are between four and five thousand miners at work in the Warren district and all, according to the Western Federation organizers, are enemies to the cause of labor. Could any contention be so ridiculous?

Now, the same men who made the trouble in Bisbee and made a complete failure of their purpose to unionize that mining district are in Douglas on a like mission. We do not believe all these men are idiots; we believe they are here with the absolute knowledge that neither of the mining companies will ever grant them recognition here even if they should enroll every man in Douglas as members of their union. Can the organizers or any smelterman in Douglas hope that the C. and A. or the Copper Queen will ever surrender to the men who have heaped so much vituperation and uncalled for abuse upon these employing companies and their managers through the columns of the late Douglas Examiner which was an adjunct of the labor organization? Certainly not.

Why should any workmen in Douglas ally himself with any labor organization as a means of ending a peaceful and satisfactory labor condition in Douglas? Why should any workmen in Douglas join with Rawlings and his force of organizers to attempt here to revenge themselves in Douglas on the companies who thwarted their desires in Bisbee? So far as this paper is concerned it cares nothing for the abuse heaped upon it by those it opposed and will oppose in their efforts to bring an end to an industrial condition which we believe is satisfactory to both employer and employee.

R. A. Kirk, the republican glaucianus of Cochise county, has been swirling around the circle recently. We advise Kirk to keep both eyes on Cassidy from now until the Arizona delegates to the republican national convention are named next year.

MONEY EARNED IN CITY SHOULD BE SPENT HERE.

Did it ever occur to you that to send one's money out of a city where one earns his money is a black eye to any municipality? Nevertheless such is the case, and it is a practice that should not be in existence. The money which goes monthly from Bisbee to mail order houses in Chicago, Denver, San Francisco and other large cities merely helps to foster other trade marts and deprives the legitimate seller of his rights. The money earned in a city should be spent in that city.

Bisbee merchants help to pay the expenses of the city. They live here and pay taxes. They are progressive and are always found in the vanguard when it comes to doing anything for the progress of their city. Consequently it behooves each citizen of Bisbee to think twice before making up an order for any outside concern. Some say by sending out of the city they can secure better prices; perhaps, but when the carrying charges are added to the advertised cost, and breakage and other inconveniences are taken into consideration, it will be found that the local merchant can supply the necessities and even luxuries at a much better price. However, leaving this part of the question one side, it should be remembered that it is the local business men who keep up the city. True the railroads derive some benefit but the money which goes to that source is of no direct benefit to Bisbee. Abo Uncle Sam secures some revenue, but as the articles are not mailed out of Bisbee this credit does not go to Bisbee, but the city where the stamps are purchased.

The members of the last legislature earned their money when they passed the Doran mine tax law. This law sure got the meat.

Bisbee's assessment will stand this year at about \$3,000,000. Bisbee is growing in wealth and population at a pace that should be entirely satisfactory to all.

Well, if the republicans of Arizona do not succeed in roping Kibbey as a congressional candidate, how would Hon. B. A. Fowler do for a second heat?

THERE ARE WOMEN EVERYWHERE

Who can testify to the wonderful merit of Hostetter's Stomach Bitters when the system is weak and run down, the blood in an impoverished condition and nerves unstrung. Every such sufferer should therefore resolve to get a bottle of

at once. For 54 years it has been making and keeping sickly people well, and won't fail in your case. It will tone and strengthen the entire system and cure Sick Headache, Cramps, Nausea, Heartburn, Indigestion, Costiveness or Female Ills. You'll find it pure

This paper is here to stand by conditions which have resulted in twenty-five years of industrial peace and prosperity in this mineral country. Our advice to the workmen of Bisbee is now and ever shall be: Beware of the labor agitator who is agitating at so much per. To his mind there must be wrongs to be righted. That is a condition where he comes in for a salary. Industrial peace, such as we have always had in Bisbee, means that the walking delegate must go hungry or go to work.

Roosevelt handed the trusts another lemon.

The speech delivered yesterday by President Roosevelt would assay about 33 per cent democratic. The president is fast accepting the democratic prescription as the only remedy for the trust evil. Let him now accept the doctrine of "tariff for revenue only" and he will be very near the political perfection mark.

EXCHANGE GOSSIP OF ALL ARIZONA

Safford Guardian: On Saturday last a most unaccountable murder was committed at San Jose, the little town a few miles beyond Solomonville. Three boys were walking along in the field in a quiet, inoffensive manner, and happened to pass a Mexican laborer named Ignacio Puerlos, who was doing some irrigating. They called out "hello," and he replied in a pleasant tone. As soon as they had passed him, however, he called again, pulled a pistol from his pocket and fired at them. The bullet struck one of them, a 14-year-old son of P. Bartolomeo of San Jose, in the left breast. The missile ranged through the body, doing little penetrating the heart, came out just below the shoulder blade, and was never found. The boy fell to the ground, murmured "Oh, mamma," and in a few moments breathed his last. Puerlos went at once to the store of Cassimiro in San Jose and stated that he had shot a boy and believed that he had killed him. Cassimiro took the pistol and held him under arrest until the officers arrived, when he was taken to jail. The boys obtained assistance and their dead comrade was taken home amid universal lamentation. Justice of the Peace Bennett of San Jose at once impeached a coroner's jury, who heard the evidence in the case and rendered a verdict to the effect that deceased came to his death at the hands of Puerlos, who shot without provocation and with malicious intent. Puerlos was then taken to the county jail at Solomonville, where he is held under close guard in default of bonds of \$2,000. He can give no reason whatever for his deed. He states that he was temporarily crazy and shot without knowing what he was doing. The pistol he used was a single action 42-caliber Colt's revolver. He seems entirely rational in all other ways and has generally been known as a peaceable and inoffensive citizen.

Tucson Star: The timely appearance of Policeman Carmen Mungia in the Kentucky saloon on Gay alley shortly after 1 o'clock this morning, prevented what would in all probability have been a murder. J. W. Moreno who is unmarried and lives with his parents on Seventeenth street, between Main and Meyer streets, was dangerously stabbed in the back by Jose M. Cortez. The would-be murderer has been in the city jail before on a charge of drunkenness. Just as the policeman entered the saloon Cortez made a lunge at Moreno, who had his back turned. Cortez had in his hand a deadly knife and plunged it deep into Moreno's back. With a groan the latter staggered several feet and turning made a rush at his assailant and putting all his strength into one blow caught Cortez full on the jaw and sent him to the floor. Before Cortez could renew the attack with the knife Policeman Mungia had seized and disarmed him.

Tucson Citizen: Late yesterday afternoon Sheriff Henry Meyers was found in his office by a boy bearing a message from a woman named Ursula Buteras, who through her messenger informed the undersheriff that she had been attacked and almost killed by her husband on the night of August 6, and requested Mr. Meyers to call at the house as soon as possible. Meyers, accompanied by a deputy, last night visited the place, found the woman in the condition she had stated and arrested her husband, who had made the brutal assault. According to the story of the woman she was lying on a pallet on the floor of the hut on the night of August 6, when her husband entered in a drunken condition and in the half darkness stumbled over her form huddled on the floor. Enraged, apparently without cause, the man seized a murderous looking butcher knife from a table and began slashing the defenseless woman about the face and head. Finally from the excessive loss of blood the woman fainted and her faithful husband, feeling her form becoming lifeless in his arms, dropped the body to the floor and fled from the house. Later he returned and retired without even taking a look to see whether the woman he had assaulted was dead or not. Since that time Mrs. Buteras has been lying stretched out upon the floor of the wretched house without care or medical treatment. Her husband would daily condescend to throw a little food on the floor beside her as if she were a dog, and on this she has subsisted for the past nine days. By yesterday afternoon she had regained sufficient strength to call a passing boy to the house, and, telling him her tale, requested the lad to inform the authorities which he did. Buteras, the murderous husband, was lodged in the county jail and will be held there until it is known positively whether the woman will recover or not. Meantime, the wife has been given medical treatment and lies in the same room in which she was so nearly killed, hovering between life and death.

FOREST SUPERVISOR HAS DOUGLAS OFFICE. Big Establishment That Has Charge of Thousands of Acres. DOUGLAS, Aug. 21.—(Special).—A government office nearly as big as the immigration office—and nearly as important—has this week removed to Douglas. Few people realize that the supervisor of the forest service who is even today putting down carpets in his new office in the First National bank building has control absolutely of 300,000 plus 150,000 of Arizona acres which are valuable enough to keep one state of men protecting them from invaders and another observing them in the service of science. The scientists and the protectors and maybe the invaders, too, will hereafter center in Douglas, as the metropolis of southeastern Arizona.
